Write the total number of valence electrons for each of the following Lewis dot structures.
Lewis Dot Structure $\left.\begin{array}{c}\text { Total } \\ \text { Number } \\ \text { of Valence } \\ \text { Electrons }\end{array}\right]$
Lewis Dot Structure $\left.\begin{array}{c}\text { Total } \\ \text { Number } \\ \text { of Valence } \\ \text { Electrons }\end{array}\right]$

For each type of molecular geometry, identify the number of bonding and nonbonding domains around the central atom. In addition, write the name of the molecular shape.
